

Stadium Coating Systems

High-performance coating solutions

High-performance coating and waterproofing systems engineered for stadiums, arenas, and large public venues — specified for **durability, constructability, and long-term service life.**

Thermal & Moisture Protection

Waterproofing

Applications

Concourse floors | Seating bowl solutions | Ramp solutions | Stairs and risers | Loading dock and mechanical room

Traffic & Pedestrian Waterproofing

- Vehicular and pedestrian deck systems.
- Parking structures and ramps.
- Plaza decks and occupied spaces below.

System Characteristics

- Crack-bridging membranes.
- Proven long-term performance history.
- Seamless application eliminates leak paths.

Design Benefits

- Reduces risk at transitions and penetrations.
- Structural protection and waterproofing.
- Enhanced durability and wear resistance.
- Improved safety and safety markings.
- Reduced maintenance and downtime.

Roofing

Applications

Roofing solutions for substrates: Concrete | Metal | Single Ply | Built-Up | Over Polyurethane Foam

Roofing System

- Seamless elastomeric roof coatings.
- Restoration of qualifying existing roof assemblies.
- Reflective options support energy efficiency goals.

System Characteristics

- Resistance to wind uplift, hail and weathering
- Seamless application eliminates leak paths.
- Substrate compatibility.

Design Benefits

- Supports reroofing without tear-off (*where applicable*).
- Sustainable sites credit 7.1: Heat island reduction.
- Extended service life.
- Thermal stress reduction.
- Superior waterproofing.
- Compatibility and versatility.

Finishes

Resinous Floor & Wall Coatings

Applications

Concourse floors | Service corridors | Food service & maintenance areas
| Locker-rooms | Restrooms | Kitchens | Protective systems for loading
docks, slab on grade and staging areas

Flooring Systems

- MMA
- Urethane
- Epoxy
- Hybrid-Systems

System Characteristics

- Seamless coatings provide an impermeable surface that resists contamination.

Design Benefits

- Proven long-term performance history.
- Fast return to service.
- Customized colors and logos for teams (*flake-quartz and metallic*).
- Anti-slip coatings.
- Seamless and modern aesthetic.
- Textural variety.
- Versatile application.

Architects and Specifiers

Technical Information | Testing | Warranties

Guide Specifications & Details

- CSI-formatted guide specifications available.
- Standard and project-specific system details.
- Compatibility review for adjacent substrates and materials.
- Transition detailing at drains, joints, penetrations, and terminations.
- Assembly coordination support with roofing and waterproofing scopes.

Quality Control & Application

- Licensed applicator network.
- Pre-installation conferences supported.
- Substrate evaluation and moisture-testing guidance.
- Jobsite technical support available.
- Installation per manufacturer's written instructions.

Warranties & Risk Management

- Manufacturer system warranties available.
- Warranty terms coordinated with system selection.
- Single-source accountability for materials and performance.
- In-house manufacturing supports long-term product continuity.

Performance Testing & Data

Neogard® systems are supported by third-party testing and long-term performance validation:

- Crack-bridging and elongation testing.
- Water immersion and hydrostatic resistance.
- UV and accelerated weathering exposure.
- Slip resistance (*where applicable*).
- Adhesion to common stadium substrates.

Regulatory & Industry Listings

- UL Classified / UL Listed assemblies.
- Miami-Dade County approved systems.
- Energy Star-rated options.
- CRRC-rated.
- LEED-supportive product selections.

Specifier Support

From Design Through Construction

- Specification assistance and review.
- Value-engineering support without performance compromise.
- Detail integration and constructability consultation.
- Construction administration support.

Neogard, A part of Hempel, manufactures high-performance coatings specified and used for structures across the globe for over 60 years. Neogard's coating systems protect the building envelope through vehicular and pedestrian traffic coatings, protective roof coatings, seamless flooring and elastomeric wall coatings. You can find Neogard coatings in Major Stadiums and Arenas, Office Buildings, Universities, Hospitals, Hotels and Casinos, Airports and Hangers, Government Facilities, Manufacturing Plants and more.

About Hempel

As a world-leading supplier of trusted coating solutions, Hempel is a global company with strong values, working with customers in the protective, marine, decorative, container and yacht industries. Hempel factories, R&D centers and stock points are established in every region. Across the globe, Hempel's coatings protect surfaces, structures and equipment. They extend asset lifetimes, reduce maintenance costs and make homes and workplaces safer and more colorful. Hempel was founded in Copenhagen, Denmark in 1915. It is proudly owned by the Hempel Foundation, which ensures a solid economic base for the Hempel Group and supports cultural, social, humanitarian and scientific purposes around the world.
