

T Series of Systems

Traffic Coatings

Reinventing Traffic Coatings with Neogard's T Systems

Get Tough On Maintenance

Neogard's pre-textured systems are a series of next generation traffic coating. These innovative coating systems combine the proven track record of our Auto-Gard system with the improved speed, handling and durability of premixing a high performance aggregate.

Proven Technology

T Systems uses liquid coatings that are part of the current high solids and low odor products have been used successfully for over 60 years.

Integrally Textured

No more broadcasting of traditional aggregate. The topcoat incorporates a high performance synthetic aggregate in the liquid coating. This eliminates the need to broadcast hazardous silica sand, saving time and money.

Husman House - Cincinnati, OH

Longer Life

Due to the nature of the synthetic aggregate and the fact that it has wetted out in the coating prior to cure, the finished system has a much better tendency to hold aggregate over time than traditional coating systems. This results in longer system life as evidenced by accelerated abrasion testing done by Neogard®.

Higher Performance

As texture is retained for a longer time period, the T Systems maintain excellent grip over the life of the coating system and retains better coefficient of friction ratings than equally aged traditional aggregate coating systems.

Neogard, A part of Hempel, manufactures high-performance coatings specified and used for structures across the globe for over 60 years. Neogard's coating systems protect the building envelope through vehicular and pedestrian traffic coatings, protective roof coatings, seamless flooring and elastomeric wall coatings.

You can find Neogard coatings in Major Stadiums and Arenas, Office Buildings, Universities, Hospitals, Hotels and Casinos, Airports and Hangers, Government Facilities, Manufacturing Plants and more.

About Hempel

As a world-leading supplier of trusted coating solutions, Hempel is a global company with strong values, working with customers in the decorative, marine, infrastructure and energy industries. Hempel factories, R&D centers and stock points are established in every region. Across the globe, Hempel's coatings protect surfaces, structures and equipment. They extend asset lifetimes, reduce maintenance costs and make homes and workplaces safer and more colorful. Hempel was founded in Copenhagen, Denmark in 1915. It is proudly owned by the Hempel Foundation, which ensures a solid economic base for the Hempel Group and supports cultural, social, humanitarian and scientific purposes around the world.
